DESCRIPTION

The Grain Elevator Operator will directly answer to the Plant Manager, or in the absence of the Plant Manager to the Head Miller or Miller on duty. Responsible for all phases of incoming wheat and wheat transfer, equipment operation and maintenance, and sanitation of the entire grain elevator, drive-throughs, and scale area. Other responsibilities include calculating grain quotas and conducting tests to determine grain quality. Purchasing grain, arranging for transport or storage, and operating the equipment that cleans and moves the grain. Grain elevator operators also load trucks and railcars and act as farm supply sales agents for fertilizers, insecticides and other farm supplies.

KEY RESPONSIBILITIES

Quality of products coming into and leaving the facility:

- Responsible for efficiently coordinating daily lab activities by training and assigning daily work to available quality personnel
- Participating in daily meetings and assemblies/disseminates communication to the appropriate departments as needed
- Daily monitoring and follow up for product quality for each shift
- Updating and maintaining testing equipment
- After analysis of the wheat sample, the operator will make a determination as to which bin the wheat will go into for blending purposes.
- Inspect the operation of the wheat cleaning and handling equipment.
- The operator will be responsible for all preventative maintenance on the elevator equipment.
- The elevator operator will be responsible for any vomitoxin testing of the wheat and mill products, and the accurate documentation of the results.
- The operator will be responsible for the sanitation of the entire grain elevator according to the sanitation checklist.
- Documentation of all HACCP records, and any other associated AIB, GMP, or related forms.
