

# Grain Milling Plant Manager

**GRAIN MILLING  
CAREER NETWORK**  
POWERED BY

## Manage all aspects of complex manufacturing operations.

A plant manager is responsible for overseeing all aspects of a grain milling facility's operation, ensuring efficient and cost-effective production that meets quality and safety standards. This involves managing plant staff functions, including human resources, finance, and engineering, and collaborating with other departments to achieve company-wide objectives. The plant manager also plays a key role in driving innovation and continuous improvement within the plant.

### Career Responsibilities

- Personnel management, including functional managers who directly supervise employees in Production, Quality Assurance, Maintenance, Finance, Procurement, Material and Production Planning, Sanitation, Human Resources, Warehouse and Engineering
- Oversee the recruitment and training of new employees, including planning, assigning and directing work, and appraising performance
- Carry out supervisory responsibilities in accordance with the organization's policies and applicable laws
- Personally demonstrate a commitment to food and human safety

### Other Job Titles

- Operations Manager
- Production Manager

### Educational Requirements

- Bachelor's degree in a related field (e.g., Engineering, Business Management, or Industrial Technology)
- Master's degree can be an advantage
- Relevant certifications (e.g., Project Management, Six Sigma) are beneficial
- Extensive experience in milling operations or a related industry

### Salary Range

- \$98,000-\$215,000
